# Introduction

# 4

New Loops presents Pluck Bass for Kontakt – an indispensable collection of 105 pluck basses suitable for any genre of electronic music. Pluck bass for Kontakt is packed full of thick analogue plucks, wide wavetable plucks, classic dance basses, and plenty of new and unique bass sounds.

We've recorded the best sounds from many of our preset packs and put them inside Native Instruments Kontakt to create this collection of bass instruments. There's a custom GUI with 5 knobs for controlling the sound.

Please note: these bass patches are not multi-sampled instruments and therefore have a limited range which is best played within an octave of the original sample.

# Installation

Installing this sound pack is easy. Simply download the zip file and unpack. You can then move the entire folder to your preferred place on your hard disk.

You'll find the patches in the **Kontakt Instruments** folder. You can use Kontakt's file browser to locate the patches or drag and drop patches from the folder onto Kontakt.

**Requirements:** Requires Native Instruments Kontakt 5.8.1 or later.

**Please note:** These audio files are in wav format and are available to use in any audio software and hardware that supports the standard wav format. You can find them in the **Samples** folder.

Please keep a backup copy of your sound pack.

New Loops Pluck Bass for Kontakt features a custom user interface with 5 knobs. These are Release, Cutoff, Low EQ, Reverb, and Size.

Here's what each knob does:

- Release - controls the amp envelope release time
- Cutoff - controls the lowpass filter cutoff frequency
- Low EQ - boosts or cuts the bass frequency
- Reverb - adds reverb effect
- Size - changes the reverb size

Tip: Try mapping the mod wheel or aftertouch to the filter or reverb.

# New Loops

7

New Loops is an English sound design label publishing audio sample packs and synthesiser presets in the pro audio market. With a focus on quality and usability, New Loops sounds are used by DJs, producers, music studios, and composers all over the world.
