

QUARANTINE

A person wearing a dark, hooded protective suit and a gas mask with a large, cylindrical filter. The person is positioned in the foreground, looking towards the camera. The background is a scene of destruction, with a multi-story building that has been severely damaged and is on fire. Debris is falling, and bright orange flames and sparks are visible. The overall atmosphere is dark and ominous, with a color palette dominated by dark blues, greys, and fiery oranges.

Introduction

4

New Loops presents Quarantine - 64 Massive X presets for modern electronic, cinematic, and soundtrack music. Get the sound of a dystopian future, explore alien planets, and be inspired with space-age pads and sound effects.

Quarantine - Massive X Presets features 6 categories of sounds including Bass, FX, Keys, Leads, Pads, and Sequences. From one-finger soundscapes, to chugging basslines, beautiful synth keys, to soaring leads, Quarantine will inspire you in times of studio isolation.

All presets are level matched to about -6 db to avoid clipping. All presets have the mod wheel and macros assigned with many also having aftertouch for expressive playing.

These Massive X presets are suitable for a wide range of music genres including soundtrack and cinematic, game sound design, electronica, trance, techno, edm, drum and bass, and more.

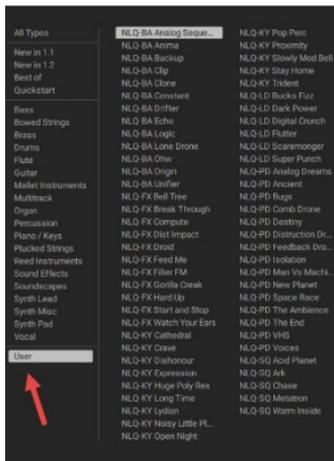

Installation

5

Installing this sound pack is easy. Simply download the zip file and unzip. You can then move the entire folder to your preferred place on your hard disk.

Add Presets to Massive X

At the time of release there is no proper way to handle third party presets in Massive X. Because of this you must put these presets in the “user” folder (see image). Unfortunately, all user added presets get mixed together in a single list. As a workaround, we have added the prefix NLQ- to these presets so they should be easily identifiable. We will update this as soon as NI allows!

Since the 1.2 update, it is now possible to drag and drop the preset files on to Massive X’s GUI to import them. See the Massive X user guide for more details on loading presets.

Requires Native Instruments Massive X version 1.2 or later.

Please keep a backup copy of your sound pack.

New Loops

6

New Loops is an English sound design label publishing audio sample packs and synthesiser presets in the pro audio market. With a focus on quality and usability, New Loops sounds are used by DJs, producers, music studios, and composers all over the world.
