Introduction

New Loops presents Synthmaster One Bass Expansion. Unleash the power of SM1 with 50 new bass presets including, punchy, modern dance basses, huge metallic wobbles, morphing wavetable basses, formant and talking basses, deep 808's, nasty neuro reeces, FM techno basses, classic garage subs and loads more!

Each preset is level matched, fully tagged with description, and has the mod wheel and aftertouch assigned.

These Synthmaster One bass presets are suitable for any style of electronic music including, edm, trap, future bass, pop, dubstep, drum and bass, house, techno, trance, electronica, and many more.

Usage Tip: The Mod Wheel and Aftertouch are assigned to various parameters and offer control over the sound, usually controlling the filter, LFO speed, timbre, or adding vibrato. Test the Mod Wheel and Aftertouch on each preset.

CPU Tip: All presets have x4 oversampling by default. You can turn this down to save CPU, however it may affect the sound.

Installation

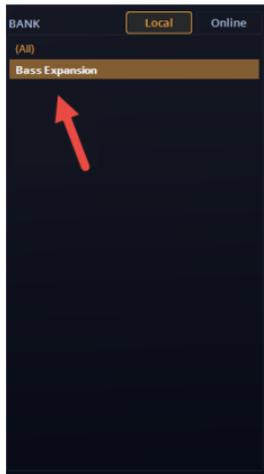

Installing this sound pack is easy. Simply download the zip file and unpack. You can then move the entire folder to your preferred place on your hard disk. You will need to locate the “Bass Expansion” zip file in the next step.

Add Presets to Synthmaster One

Open Synthmaster One and click the Browser button. Right click the browser window and select “Import Bank(s)”. You need to locate and select the zip file called “Bass Expansion”. Once imported, the bank and presets will show in the Browser. See the Synthmaster One user guide for more details on using presets.

Requires KV331 Audio Synthmaster One version 1.3 or later.

Please keep a backup copy of your sound pack.
